Subject: Cleaning Portlands River

Dear EPA

I don't know that you received my comments so i am re-sending my letter to you.

Please consider alternative plan G with additional dredging in areas of high human use. The value to future generations of Oregonians and our wildlife is sensible and needs your protection. Our rivers can be pristine once again and provide healthy economic growth to recreational industries, tourism, small businesses and citizens in general.

People do need clear guidelines when it is safe to fish. Those who rely on fish for their source of food deserve to not be putting their health in jeopardy. More education to the public regarding why clean water and air matters needs to happen now.

The disposal facility being a toxic waste dump is a insane idea. We are expecting a potential earthquake. This ticking time bomb would have an ecological impact of such magnitude that Oregon's environment would be destroyed through contamination. Eco-systems would be impacted perhaps for years to come. Can we not think forward on this rather than wait till it happens.

Polluters should be addressed more aggressively with laws that really impact their pocketbooks. They need to be accountable for their indifference and lack of conscience with regards to their fellow citizens welfare and the beautiful state of Oregon. Polluters know what they are doing is harmful and they don't care. In this day of awareness how can anyone say they did not know and run a business. Its costing our gov. and tax payers huge amounts of money for their deeds. It has to stop and responsibility place squarely on their shoulders.

Please help us and the environment here in Oregon.

Thank you

Sincerely,

(b) (6)
Oregon 97116
